

**How do aquatic microbes affect water quality?**

**Are antibiotic resistance and toxin production associated with specific aquatic habitats?**

Positions are available for

## **talented MSc/PhD students or post-docs**

to take part in an interdisciplinary collaborative project combining **microbial ecology**, **(meta)genomics** and **computational biology**

The study is a collaboration between the Department of Marine Biology, University of Haifa and the Faculty of Medicine of the Technion. The project will require field work, laboratory and computational approaches.
